

Academic Integrity North America

Join a collaborative project to develop an online program that empowers students, faculty and staff to uphold the principles of academic integrity.

The *Academic Integrity* program supports not only the imperative for ethical behavior in academia, but also the multidimensional cultural aspects of student success that underpin the college community and its reputation.

The unique teaching and learning approach encourages a community-oriented philosophy of education where students, faculty, and staff all share in the responsibility of upholding best practices for an integrity-positive environment.

Academic Integrity will:

- Support students to achieve academic success with integrity
- Coach faculty and staff in supporting students to maintain academic integrity throughout their academic journeys
- Include interactive activities that offer participants the chance to engage in a more meaningful way
- Offer optional impact tools so that institutions can measure attitudes to academic integrity and evaluate the impact of the program on those who complete it.

 Academic integrity is the backbone of the higher education institution. Society trusts educational institutions to provide exceptional opportunities for learning; honest and fair assessments of that learning; and trustworthy certifications that learning has occurred and can now be applied to professional and civic life. Yet, students, faculty and staff often struggle to ensure the integrity of those opportunities, assessments and certifications within the complex educational and societal environments of the 21st century.
