Introduction Text

Advancing Your Research Career is an interactive online training program available to all students and faculty. Developed by higher education professionals, the courses support researchers as they navigate the complexities, and challenges of the current research landscape. This programme supports researchers across all fields and disciplines to take a strategic and reflective approach to managing their research career. [Contact...to find out how to sign up](#)

Research Careers can be diverse, rewarding, and exciting, yet the move from being an early career researcher to becoming a research leader can also be complex and challenging. *Advancing Your Research Career* supports researchers in this transition, providing engaging, flexible, and interactive training in the key capabilities that underpin successful research leadership. [Contact...to find out how to sign up](#)

Advancing Your Research Career is a new online course available to students and staff of all disciplines looking to advance their research skills. This programme helps to support you as you transition from being an early researcher, to a research leader, and encourages the development of transferable skills which will enhance your career.
