

# Reflect on your research journey so far and plan your next steps

*Beyond Research* supports researchers at the later stages of their research journey, offering exceptional learning opportunities in career planning, innovation and entrepreneurship. From unlocking new entrepreneurial opportunities to tracing their own professional development path, these courses will empower doctoral researchers in mastering the next step of their careers.

Access the *Beyond Research* programme here:

## Beyond Research courses:

- **Innovation and entrepreneurship** helps researchers recognise the positive impact that research can have on society, highlighting the importance of social responsibility in innovation, and exploring how to effectively engage with industry during and after doctoral degrees.
- **Career Planning** encourages researchers to reflect on their research journey, assess their skills and experience, manage their professional development, and think about the practicalities of finding and applying for jobs, while maintaining wellbeing and building up resilience.
